To Whom It May Concern,

I was a Research Associate/Fellow from May 2001 to March 2004 in NTU/EEE under the supervision of Prof Tan Cher Ming. During the three-year period, I have gained a lot knowledge from him. Prof Tan not only provides the right research directions, but also discusses with us to grasp the details of the research topics. As a result, we have published about 15 papers in refereed journals and international conferences. Now when I am working in industry, I find that his research activities are really what the industry is interested in. My staying with him is indeed a beneficial experience to my future.

I strongly believe that Prof Tan has contributed and will continue to contribute to NTU's development. If any more information is needed, pls let me know without hesitation. Thanks very much for your attention!

Sincerely yours,

Zhenghao Gan, PhD
