

Prof Cher Ming Tan is a great teacher as well as an excellent researcher. I had the honour to study my PhD (2013- 2018) and also worked as a Postdoctoral Fellow (2018 - 2021) under his supervision where I learnt important lessons such as hard work, discipline, humility and passion for the subject. During my tenure under his supervision, I have learnt the basics of the subject and problem-solving skills that helped us in inventing new product designs and publishing good quality research papers. It was a great pleasure studying and later working under Prof Tan's supervision. Good luck to Prof Tan and all members of CReST.

Duration: PhD (2013- 2018) and Postdoctoral Fellow (2018 - 2021).

A handwritten signature in black ink, appearing to read 'Preetpal Singh', is written above a horizontal line. Below the line, the date '1st Feb 2021' is written in a similar cursive style.
