

Commendations from Ex-Students

I have joined Prof. Tan for 6 months internship at Nanyang Technological University (NTU), Singapore from Dec 2013 to May 2014. After my internship, I joined Ph.D. under him from 2015 to 2019 and keep continued my research work with him as a Post-Doctoral researcher till 2020. During this long period of time, I found him a person with a positive attitude, possess a problem-solving attitude, and always have dedication towards scientific research which evident through his dedicated planning and implementation. He is a person with a result-oriented mindset and always encourages his team to move forward despite any challenges. I am fortunate to join him and learned these qualities from him.

A handwritten signature in black ink that reads "Vivek." with a small horizontal line under the letter 'v'.

Vivek Sangwan (Ph.D.)
