

I joined CReST as a Research Intern in October 2017, after getting hands-on experience, theoretical knowledge, and research guidance from Prof. Tan, I decided to join CReST as a Graduate (MS) student. During my term under his tutelage, I learned important lessons like Discipline, modesty, and appetite for knowledge and skills.

In CReST, I got the chance to work on multiple industrial and academic projects related to data science and electronics. I also published two SCI-indexed journal papers and two international conference papers. I also got a chance to interact with several national and international personalities. It was a long and wonderful journey at CReST-CGU. Finally, All the best to Prof Tan and the CReST family.

Duration: October 2017- June 2020

Regards
Sumit Pandey

A handwritten signature in blue ink that reads "Sumit". The signature is written in a cursive style and is underlined with a single horizontal line.
